

# 3D sides card photo frame

MATERIAL NEEDED (for a 10X15 cm photo) :

- \* Coloured card (at least A4)
- \* Scissors, glue (or double sided tape), a pencil and a ruler
- \* Any decoration (stickers, sequins, buttons...) - OPTIONAL

1. Place your 10X15cm photo in the middle of your sheet and draw around it creating the outline with the pencil.
2. Divide your sheet as shown in the template, using the ruler and drawing the lines with the pencil
3. Cut along the red lines and fold along the green ones, creating the 3D sides of the frame.
4. Place your photo in the middle and secure it with a bit of glue (or double sided tape). The frame sides should fit together in the corners, but you could secure them further with a bit of glue there too.
